

Smart Science is an international multidisciplinary peer-reviewed journal that publishes significant original scientific researches, plus reviews and analyses of current research and science policy. We welcome submissions of high quality papers from all fields of science and from any source. Articles of interdisciplinary nature are particularly welcomed. We aim to bring out the research talent and the works done by scientists, academia, engineers, practitioners, scholars, post graduate students of engineering and science so that fellow researchers can get benefit from the research done. From time to time, the journal will publish review articles and bring out special issues on a specific sub-field of science and engineering.

Smart Science focuses on publication of interdisciplinary science researches. The journal's specific focus areas include, but are not limited to:

- new physical or chemical experiments and analysis
- new theory and algorithm,
- new smart machines and systems,
- new smart materials,
- new smart devices,
- new smart energy,
- new smart sensors and actuators,
- new smart instruments,
- new smart design,
- new smart information system,
- new key industrial technologies,

,which are related to all branches of science, engineering, and modern technology (bio or nano technology).

Online Submissions
