Electronic Editing

The journal is using personal computers to edit manuscripts accepted for publication. Submission via website attaching the text is required to reduce typing error in the process of publication. The text file should be in major formats, such as Microsoft Word. Authors are required to check spelling and grammar before submission.

Preparation of Manuscripts

Original Articles should be organized in order of title page, abstract page, introduction, materials and methods, results, discussion, acknowledgments (if necessary), references, table/figure legends,

figures. Case reports may be organized in order of title page, abstract page, introduction, case report, discussion, references, table/figure legends, figures. Interesting images may be organized in order of title page, abstract page, figure legends, references, figures. Each starts from a new page. The Chinese manuscript should have an English translation of abstract and keywords, and vice versa.

Abstract and keywords of the English manuscript from authors who are not native Chinese can be translated by editorial office. All pages must be typewritten on one side of white A4 size paper, sequentially numbered, double-spaced with liberal margins.

Title Pages

The title page should contain title of the article; name(s) and affiliation(s) of author(s). All footnotes to the names of the authors and affiliations should be indicated by Arabic numeral in superscript. Designate one author as the corresponding author and provide address, phone numbers, fax number and E-mail address. Do not contain such information elsewhere in the manuscript to ensure an unbiased review.

Abstract

The abstract should be typed on a separate page and limited to 400 words or less in Original Articles and Case Reports, and 200 words in Interesting Images. Abstracts for Original Articles must be structured with paragraphs labeled Background, Methods, Results, and Conclusions. Include 3 to 5 keywords in alphabetical order. Use Index Medicus terms from medical subject heading where possible. Abbreviations may be used without explanation.

Text

References should be cited with square brackets in the text and listed by the order of appearance in the text (including Interesting Image). When abbreviating isotopes, designate them in the following manner: Tc-99m, I-123, C-11, F-18 FDG. Radiopharmaceuticals

should be listed with the isotope first followed by the chemical form. When using abbreviations, the full name should be spelled out completely the first time it is mentioned, followed by the abbreviation in parentheses. Thereafter the abbreviated form must be used. Radiation measurements will be published in either the International System of Units (SI) or the old system. For more details, authors are advised to consult the “Uniform Requirements for Manuscript Submitted to Biomedical Journals” (Ann Intern Med 1998;108:258-265). However, the editors are authorized to make changes to conform to the individual style of Annals Nuclear Medicine and Molecular Imaging instructions to authors.

References

Names of the journal are abbreviated according to Index Medicus. Name(s) of the author(s) not more than six are factually listed. Otherwise the first three are listed and followed by “et al.”

Figures should be submitted as one set of clear black-and-white glossy prints, with lettering large enough to be legible when reduced. Color illustrations can be reproduced if the additional cost is met by the author. Each figure must be provided with a legend. Type legends double-spaced on a separate sheet of paper. If an illustration has been previously published, give full credit to the original source in the legend. Figures and tables should be numbered in the order they appear in the text. Each legend should give full, explicit, explanations for all sections of the figure and all abbreviations and arrows used. Each table must be typed double-spaced on a sheet of paper. A concise title should be supplied for each. If a table or any data therein have been previously published, a footnote must give full credit to the original source. Abbreviations used in a table must be spelled out in a footnote. Tables and figures should supplement, not duplicate, data in the text.
