Abstract

College students' Probity education is a new subject to strengthen college students' ideological and political education. Striving to accurately grasp the connotation and characteristics of College Students' Probity education is one of the key issues to be solved in this new subject. College students' Probity education refers to the social practice activities in which educators exert purposeful, planned and organized influence on college students with the ideological theory of honest culture, so as to continuously improve their consciousness of moral self-discipline, enhance their good psychological quality of resisting corruption and changing, and gradually form the professional concept of honesty and self-discipline, and love their jobs and devotion to their work.

Keywords

Probity Education, College Students, Youth Subculture.

1. Introduction

The probity education of college students is an important part of the ideological and political education of college students. It is also an important branch of our party's anti-corruption work, and it is also a powerful grasp of the core values of socialism in the new era. At the moment, young people live in an era of rapid change, and every day they receive messages of mixed feelings. In the critical stage of youth setting up world outlook, outlook on life and values, it is extremely vulnerable to the influence of the environment, and university education plays a particularly important role. Students live on campus for a long time. When they combine family education and social education, they should highlight the dominant position of university education. However, the probity education of college students is not a matter of school. It should be the participation of the whole society and the formation of overall synergy. Throughout today's various types of jobs, university degrees already occupy a majority. Today's college students will enter the society in the near future, and they are an important source of talents and national party and government cadres in various fields. History is the coordinates of the future. As soon as possible, we can prevent high-quality talents, and we can not only cultivate high-quality talents for the society, but also spurt and clarify the spirit to cultivate a new era for the society, thus promoting the development of social civilization.

2. Necessity of College Students' Probity Education

According to the latest statistics from the National Bureau of Statistics, the number of students in ordinary and junior colleges in China reached 30,315,262, and the number of graduates reached 7,585,298[1]. The number of students and the number of graduates in the previous years will gradually increase. Whether or not college students realize their responsibility, they will soon become the successors of this society. Everyone will be a component of society. If the self-position is not firm and the value orientation is not correct, the self-study will be enlarged by social factors, and the small injustice will become a major corruption. The political attitudes, value standards, and behaviors of the current college students are also affected by the rapid development of society and the explosive spread of information, showing diversity and

uncertainty. At present, there is indeed a phenomenon of college students' inefficiency in the university. The current honest education has not followed the development of the times and has a lag. It seems that it is particularly important for the special population of college students to carry out innovative education.

2.1. Corruption phenomenon

Wang Yi, a famous scholar in the Eastern Han Dynasty, commented in "The Songs of the South" that "not being probity, not filthy and clean", that is to say, not accepting the gift from others, and not letting his innocent character be tarnished. It is probity. And what is corruption? It is a different positioning for different groups of people, different roles, and corresponding. In "said the text", it is said that "lian, ze" the side of the church is cheap, so from the wide", Lian is the earliest refers to the angularity, and then extended to mean Probity, with the meaning of Probity. As far as college students are concerned, they cannot simply understand the inferiority as "power" and "money". They should return to the essential meaning of honesty, and more should be reflected in whether the ideology and conduct are correct and whether the value orientation is correct.

2.1.1. Unfair competition

Nowadays, the mainstream of college students is good, but the phenomenon of insecurity is still not uncommon. First, the evaluation of the award is unfair, "pull gang", malicious competition. The daily performance of the students is average, and the evaluation is first and foremost, and there are no shortage of individuals. In order to have more "one-paper voucher" in their resumes in the future. Most of the evaluations were voted by class, so there was a practice of "bringing out gangs" and "launching cronies". When the scholarship is judged, the comprehensive scores are not enough. All the extracurricular activities are added together. In the middle, there will be a "partial smuggling" that has a harmonious relationship and a "just right".

2.1.2. Academic misconduct

Lack of probity, academic fraud, academic misconduct. Learning does not pay attention to the basic accumulation, on weekdays, the exams want to take advantage of the opportunistic and other methods to obtain high scores. It's not an accidental phenomenon that academic misconduct such as academic plagiarism is frequently exposed. When you taste the sweetness of "walking the shortcut", you will change from the psychology of secret self-satisfaction to the greedy overstepping of the bottom line.

2.1.3. Value distortion

The third is the distortion of values, exquisite self-interest, and worshipping money. Looking at the revolutionary ancestors, and looking at the parents and grandparents, although they are in an era, the material is not as full as today, and the living conditions are extremely harsh, but their spirit is the hard work and selfless dedication that is integrated into the bones. On the other hand, more is to grow up in the comparison, to live in pleasure, to be self-indulgent in self-interest. Of course, we can rationally pursue a high-quality life. However, while enjoying the products of the development of the times, we should put the spirit of hard work and selfless dedication into the study and work. Now the nature of campus online lending and the "post-90s" job-hopping phenomenon is the distortion of values.

2.2. Causes of uncleanness

There are many reasons for the formation of non-corruption phenomenon, both internal and external. The internal reason is that students have a low degree of recognition of the current form of Probity education. External causes include frequent occurrences of social incorruptibility, which has a greater negative impact. Colleges and universities have not formed a long-term education mechanism and evaluation system. This is worth thinking about.

2.2.1. Difficult to accept

The form and content of Probity education did not gain a sense of identity among college students. The form of honest education is often in the form of lectures, video conferences, notices, commitments, etc. In terms of education itself, it is more to deal with errands, respond to calls, and the final results are not significant. College students are generally resistant to this indoctrinating and passive education. The "post-90s" generation, the most frequently labeled, is often the pursuit of individuality, self-confidence and vulnerability, sensitivity and selfishness. It is easier for them to accept the youth subculture content of the media, especially the Internet, as the mainstream culture, and to absorb the values promoted by the subculture as the mainstream healthy values. The term cloud-sucking youth is also derived. According to CNNIC statistics, as of June 2020, the number of Chinese netizens reached 940 million[2]. Young college students are more keen on the Internet, the cloud sucks the pet, the cloud sucks the object, the cloud sucks the idols, and never has the "cloud culture". In other words, the Probity education has not yet deviated from the traditional old-fashioned offline mode. The fascinating youth subculture and the emerging culture represented by the network culture have begun to pose great challenges to the traditional old-fashioned education of college students. Probity education needs to be innovated, forming a symbol that matches college students and gaining a sense of identity. Probity education is not only floating on the surface or dancing with a gun, but it is deeply rooted in the hearts of the people and attracts students to study consciously.

2.2.2. Negative effects

The negative impact of society and the result of probity education. In recent years, with the gradual deepening of the anti-corruption work of the central government, the intensity of fighting tigers has gradually increased. The number of cases and the high level of investigations that have been investigated and dealt with have often caused some misleading people, and believe that corruption has not decreased and increased under the pressure of high pressure. More and more, this makes students disappointed in society. After the disappointment, there is more to accompany the flow. Students generally believe that "society is a relationship society", and the "scraping" thinking is still deeply rooted in the students' brains. The bad social atmosphere has a great negative impact on students' correct three views. While the media reported negative news, it did not create a positive model image. Today's youth idols are mostly large-scale traffic--video songs, and the media should promote social models of positive energy. It is precisely because of the cultivation of the clean culture of the society and the Probity education of colleges and universities that it has not yet formed an interaction, which also makes the Probity education slightly weak.

2.2.3. No long-term mechanism

There is no long-term mechanism for effective education. College students' Probity education is an organic component of college students' ideological and political education. It is also an important branch of our party's anti-corruption work. It is also a powerful hand to promote the traditional virtues of China and the core values of socialism in the new era. Today's university education and family education Social education is not closely integrated. Instead, it is separated from each other and independent. It often ignores the multiple attributes of college students. Besides students, it is also a child and a member of society. In addition, there is no perfect working mechanism for propaganda, cultural thinking, concrete implementation, and incentive and punishment systems. Only after perfecting the working mechanism can we provide a guarantee for the Probity education to be implemented and carried out in depth.

3. Definition of College Student' Probity Education

It is precisely because of the special identities of college students that cultivate their sense of probity, so that they can buckle the first button in their lives. After entering the society, there

will be no problems of probity. Probity education at the university level can also achieve the goal of cultivating virtue education, and the core values of socialism can be planted in the college students to form a good social atmosphere.

3.1. Cultivating high-quality talents

Colleges and universities are important positions for cultivating talents for the positions. Xi Jinping said in his speech at the Peking University Teacher-Student Symposium, "University is a place where people are talented and cultivated, and they are places where young people learn knowledge, grow their talents, and let their dreams fly[3]." The goal of probity education at the university level is to guide the students to correct their moral conduct and establish a correct value orientation. Improve the ideological consciousness of serving the motherland and serving the people, and constantly enhance the moral and legal awareness of college students. Treating both the symptoms and the root causes, and preventing the micro-duration, the college students will form a clean and self-disciplined good style, and will be good for the society and responsible for the future.

3.2. Carry forward traditional culture

Colleges and universities are important places for inheriting civilization and promoting culture for the positions. The phenomenon of indecent is actually the manifestation of the lack of traditional culture and virtue. Xi Jinping pointed out: "The core values are the soul of cultural soft power and the focus of cultural soft power construction[4]." Incorporating socialist core values into probity education is to lead students to healthy development and enhance their sense of identity. In the core values of socialism, "patriotism, dedication, Probity, and friendliness" are the requirements for each individual. If individuals lose these traditional virtues and Probity, it will lead to the emergence of probity, and corruption will also spread. How does individual disharmony lead to the progress of social civilization? Then the eight words at the social and national levels will also appear pale and weak. Probity education develops skills to help students practice traditional culture, and also enables social core values to be embedded in ideology.

3.3. Forming a good atmosphere

With one hundred and one hundred, social justice has become a common practice. The righteousness of society and the positive energy of society are not illusory. They will gradually be nourished and enlarged in a small matter. They are reflected in the words and deeds of people in daily life, and are reflected in the kind of people who radiate from the inside out. mental strength. The "domino effect" of inferiority, one down, will drive a group of people to fall. If one stands firm, it will effectively curb the deterioration of the situation, and even form a just atmosphere to infect people around. The power of this kind of connection cannot be underestimated.

4. Strategies of College Students' Probity Education

In view of the above causes, this article proposes several countermeasures. By advancing the online Probity of education, we will guide the healthy development of youth subcultures in a way that students like and are willing to accept. Through the establishment of a sound mechanism to ensure the normal development of Probity education. Establish a three-in-one education model of school, society, and family, and promote the development of Probity education in all directions.

4.1. Online education

Probity education online, leading the healthy development of "cloud youth". Through the use of new Internet means, the Probity education and clean culture are packaged into forms that are

easily accepted by college students, leading the healthy development of young subculture groups. It makes "Cloud Youth" have better and more valuable content on the Internet to learn, not just "idol" and "cute pet" on the whole network. And we must constantly enhance the educational guidance of the core values of socialism. As Xi Jinping emphasized in the report of the 19th National Congress, "to play the guiding role of socialist core values in the education of national education, the creation of spiritual civilization, the creation and production of spiritual and cultural products, and the society. The core values of the society are integrated into all aspects of social development and transformed into students' emotional identity and behavioral habits[5]."

4.2. Establish long-term mechanism

Systematic long-term mechanism to ensure the normalization of Probity education. Cultivate teachers of Probity education, clarify the mechanism of Probity education, and develop a system of student Probity assessment to ensure the normalization of Probity education. The quality of education depends on the quality of teachers and the level of teachers. The ability to focus on the professionalization of teachers will directly improve the level of Probity education in schools. Clarify the sense of responsibility of all departments and teachers, and make the responsibility mechanism from top to bottom, which will effectively promote education implementation. Formulating a system of student Probity assessment will effectively test the results of education and expose the issues of concentration, effectively and quickly adjust the focus of education.

4.3. Joint-action mechanism

4.3.1. Social education

Social school family linkage, promote the all-round penetration of Probity education. The government creates a law-abiding atmosphere through the construction of the legal system to enhance the Probity of college students. Through legal deterrence, citizens can truly recognize the law from the bottom of their hearts, fear the law, and cultivate a culture of law-abiding culture. The undergraduate students will gradually form a clean and law-abiding faith. Secondly, the government needs to control the "media", shift its focus to the positive side, correct the main theme, and promote positive energy.

4.3.2. School education

The school takes students as the main group, takes the campus as the main space, and takes the clean education and culture as the main content, and creates a clean and honest, honest and honest campus environment from the aspects of material carrier and spiritual construction. Carefully arranged on the material carrier, you can create a clean sign on the campus infrastructure, so that every corner of the campus is full of clean education. In terms of spiritual construction, it is possible to mobilize participation in all aspects and carry out activities in various forms. Build a good style of work, teaching style, study style, and form a good atmosphere of Probity. Carrying out Probity education activities in many forms, not only staying in the boring and old-fashioned way of lectures and document learning.

4.3.3. Family education

Family education is the foundation of all other education, and the concept of a family often determines the Probity of a child. Nowadays, many families have ineffective behaviors. Children who are in this environment for a long time will inevitably be affected. Therefore, family Probity education plays a vital role in the Probity education of college students. Only by providing a good family environment for the students, and providing each college student with a good family atmosphere, can we play a more in-depth and honest education.

5. Conclusion

The university stage is a crucial period for the formation of college students' outlook on life, world outlook and values. They are easy to accept new things, but at the same time they are not mature enough to make the biased culture a mainstream culture. Therefore, college students have a strong educational space and educational advantages, but also have the necessity of education. Actively explore new methods of college students' Probity education, so as to effectively enhance the effectiveness of college students' ideological and political education. To lay a solid foundation for combating corruption and promoting honesty, and further integrate socialist core values into the hearts of the people.

Acknowledgements

On the completion of my thesis, I am entirely indebted to all those who have helped and supported me during the process. I would like to extend my sincere thanks to my tutor who has provided me with valuable advice and constructive suggestions during the whole process of my thesis writing.
