

Information for Authors

Chinese Journal of Physics publishes letters, reviews, regular articles, and refereed conference papers. Letters are for rapid publications of new and interesting results, limited to six printed pages. For publication of conference papers (from a conference or symposium) the conference organizer(s) may contact and negotiate with the editor-in-chief but such papers are subject to the refereeing process.

Manuscripts are acceptable only in English; they should be typewritten, double-spaced with wide margins, on one side of white paper of standard letter or A4 size. Submission is a representation that the manuscript neither has been published previously nor is currently submitted for publication elsewhere. Only electronic submission of plain TeX, LaTeX (without special macros), or MS Word files via e-mail is acceptable. Electronic figure files are preferred to be in one of the following formats: Encapsulated PostScript (EPS), PostScript (PS), or JPEG. Authors are also encouraged to compress their files into .zip or .rar archives (using a program such as WinZip or WinRAR) and send the zipped archives rather than the uncompressed files. The e-mail address for submission is cjp@PSROC.phys.ntu.edu.tw.

The abstract should be confined to one typewritten page, preceded by the title of the paper and the names of authors and their addresses.

Each table must be typed on a separate sheet and numbered with a roman numeral (TABLE I, TABLE II, etc.).

Each figure must be carefully drawn in India ink on a separate sheet of white paper and numbered with an arabic numeral (FIG. 1, FIG. 2, etc.). Captions of figures should be collected on a separate sheet.

Each photograph should have good black and white contrast.

References should be numbered consecutively in the order of appearance in the text, and be listed on separate sheets, e.g.:

1. K. Y. Lin, *Chin. J. Phys. (Taipei)* **28**, 159 (1990).
2. K. Huang, *Statistical Mechanics*, 2nd ed. (Wiley, New York, 1987), Chap. 7.

3. K. A. Chao, in *Superconductivity and Applications* (Progress in High Temperature Superconductivity, Vol. 19), eds. P. T. Wu, H. C. Ku, W. H. Lee, and R. S. Liu (World Scientific, Singapore, 1989), p. 121.

Authors should provide PACS numbers maximum of three according to [PACS-2010](#).

For additional rules on the format for preparation of the manuscript, the author(s) may consult the format adopted by Physical Reviews which our Editorial Board chooses to follow closely.

A form for transfer of copyright may be found at the end of some recent issues of the Journal, and also can be printed out from our webpage: <http://psroc.phys.ntu.edu.tw/forms/copy.txt>
