Editorial Assistant: Chiu-Ling Wang, E-mail: bbas@gate.sinica.edu.tw

Botanical Studies is issued quarterly, in January, April, July, and October, with one volume per year. Papers are published in English with a Chinese abstract.

Botanical Studies is sponsored by the Institute of Plant and Microbial Biology, Research Center for Biodiversity, and Agricultural Biotechnology Research Center, Academia Sinica, and is open for papers on all aspects of botany. The scope of the journal extends from plant molecular biology through classical botany to taxonomy and ecology. The privilege of publication in the journal is not restricted to members of the institution; contributions from research workers worldwide are welcome. Papers submitted to this journal must be original and not have been published elsewhere. **Instructions to Authors** are published at the end of issue each year; copies can be obtained from the editorial office. Manuscripts are accepted in English. There are no page charges. Send the disk and two high quality, double-spaced printouts of the manuscript (including figures) or online submission to the **Editorial Office, Botanical Studies, Institute of Plant and Microbial Biology, Academia Sinica, Nankang, Taipei, Taiwan 115, Republic of China**. Tel: 886-2-2789-9590, Fax: 886-2-2782-7954, E-mail: bbas@gate.sinica.edu.tw, URL: <http://ejournal.sinica.edu.tw/bbas/>.

Subscription Information

Botanical Studies is available to individual subscribers for US\$15.00 per issue, US\$60.00 per volume, and to institutions for US\$25.00 per issue, US\$100.00 per volume. Please address orders and inquiries about availability to Lily Book and Journal Co. & LTD., 4F-3, No. 125, Roosevelt Rd. Sec. 3, Taipei, Taiwan, Republic of China. Tel: 886-2-2363-3168, Fax: 886-2-2362-7448.

Back issues: Prices are available on request.

Printed in Taipei by Great Corona Print Tel: (02) 2302-3939

Acknowledgment: The *Botanical Bulletin of Academia Sinica* has been honored to be the recipient of the annual Outstanding Academic Journal Award from the *National Science Council of the Executive Yuen, ROC*. The award, which includes a partial publishing grant, has been conferred on us for each of the last fourteen years. We would like to express our heartfelt appreciation.

On the cover: *Primulina* s.l. (Gesneriaceae) contains ca. 130 species mainly distributed in southern China and northern Vietnam, with the highest diversity in Guangxi. The majority of the species are narrow endemic found on various cave-like microhabitats on limestone karsts. Featured here (from left to right, top to bottom) are *Primulina tabacum* (upper left 1 and 2), *P. bipinnatifida*, *P. renifolia*, *P. fimbrisepala*, *P. lingchuanensis*, *Chiritopsis jingxiensis*, *P. repanda* var. *guilinensis*, *P. cordifolia*, and *P. guihaiensis* (Photographs by Kuo-Fang Chung). Readers are referred to Xu et al. (pp. 165-175) for two splendid new species from Guangxi.
