

Journal of Disaster Management

On the basis of extraordinary jobs done by the academic field for the prevention of disasters, the Board of Directors and Supervisors from Disaster Management Society of Taiwan anticipates not only to deliver the promotional situations as well as important information for jobs related to disaster prevention & relief through the issuance of papers with “Journal of Disaster Management,” but to offer scientific research technologies related to disaster prevention & relief as well as to set up a knowledge platform. In response to the increasing influence of digital platforms for academic papers in international prestigious journals and the sustainable development trend of specialized knowledge, and following the resolution of the third Board of Directors meeting in 2023, starting from the next fiscal year (Volume 13, Issue 1, 2024), this journal will undergo a comprehensive transition to electronic publication. This move is aimed at realizing the principles of local sustainable development and addressing climate change through environmental conservation. The shift to electronic publishing is also intended to expedite the release of academic publications and reduce publishing costs. The journal will continue to uphold the promotion of disaster prevention and rescue education and academic discourse as its core mission. In the future, adopting a digital format for journal articles, we aim to provide our members with more diverse and convenient access to journal information. We express our gratitude to all advanced members and long-term subscribers for their support, and we sincerely appreciate your understanding in case of any inconvenience caused by this transition.
